

Data Protection Officer as a Service

Fact sheet

Our DPO as a Service is a practical and cost-effective solution for organisations to fulfil their obligations under the DPA 2018 and the UK GDPR. For organisations that do this well, data protection compliance can become a competitive advantage.

Your challenges

Businesses face a complicated regulatory, reputational, and operational data privacy risk environment. Having access to an experienced and knowledgeable full-time DPO is also expensive. Failing to protect personal data can not only lead to significant financial penalties from the regulator but also risks reputational damage to your organisation.

At a glance

- Fully certified DPO who explains data protection in real business terms, so you can understand what it means for you.
- Knowledgeable, and hands-on professional who undertakes DPO's responsibilities. Backed by a team experts, best practice and model documentation.
- Expert resources to help address compliance demands, allowing you to concentrate on growing your business.

Benefits

Practical and cost-effective solution compared to an internal appointment.

Pragmatic, straightforward, solution-driven advice.

Eliminate the key person dependency risks.
